Steering committee & the team

The Steering and Strategic Foresight Committee

A place of discussion, exchange and brainstorming, the steering and prospective committee functions as a research seminar and meets on a semi-annual basis.

Diverse in its multi-disciplinarity, the committee is a reflection of the Forum's unique place at the crossroads of research, politics and artistic creation. It considers a multitude of viewpoints and promotes original comparisons, allowing for an understanding of mobility from various perspectives (social, political, anthropological and economic) and new keys for understanding.

Board of Directors

The Board of Directors defines the Forum’s general policy and aims. It is comprised of five members of the SNCF group.

Mobility

For the Mobile Lives Forum, mobility is understood as the process of how individuals travel across distances in order to deploy through time and space the activities that make up their lifestyles. These travel practices are embedded in socio-technical systems, produced by transport and communication industries and techniques, and by normative discourses on these practices, with considerable social, environmental and spatial impacts.

More
Every person, every group can be characterised by greater or lesser propensities for moving around a geographic, economic and social space. “Motility” has been the name given to these aptitudes, a reference to the use of this term in biology.
